

*The Town of
Lake Park*
Office of the Town Manager

Residents of Lake Park:

The start of Hurricane season, June 1st, is fast approaching. With the impact of last years devastating hurricane season still fresh in our minds, now is the time to start planning for the upcoming season

Please take this opportunity to review your preparations and plans for your property, your home, your vehicles, and your family and pets. Discuss your evacuation plans (if necessary) with your family and decide upon a few different courses of action, depending on weather conditions and direction of the storm.

Lastly, stock up on enough hurricane supplies, food, water, and medications to last your family at least 5 – 7 days. This is the minimum you should have on hand and will assist your family and the community in minimizing the affects of a major storm.

We have listed below some specific actions you can take that will make your home and family safer during and after a hurricane.

The staff and employees of the Town of Lake Park are here to assist you in any way possible.

Thanks for your cooperation and efforts,

Paul E. Carlisle
Town Manager
Town of Lake Park, Florida

HURRICANE PREPARATIONS

Before June 1st Hurricane Season

Around your home:

- Trim back your trees and shrubs, especially dead branches and vegetation.
- Locate and have ready storm shutters, window coverings, garage door supports, hardware, and tools necessary for installation.
- Identify and make plans to secure all loose items in your yard which may pose a hazard in high winds.
- Make plans to have all repairs and modifications to your home finished before hurricane season begins.

In your home:

- Review your family plan, everyone should know what is expected of them.
- Check your hurricane supply list, stock up on items like batteries, flashlights, and other items in advance of hurricane season.
- Make sure battery operated radios, TV's, and lights are in working order. Have a conventional phone cord in case of a power loss.
- Check and replenish your first aid kits and medical supplies.
- Identify and have a list of supplies needed to support your family for 5 – 7 days.
- If you have pets, make plans to shelter and provide for them during and after the storm.
